

Your Window into the Elastic Stack

Kibana lets you visualize your Elasticsearch data and navigate the Elastic Stack, so you can do anything from learning why you're getting paged at 2:00 a.m. to understanding the impact rain might have on your quarterly numbers.

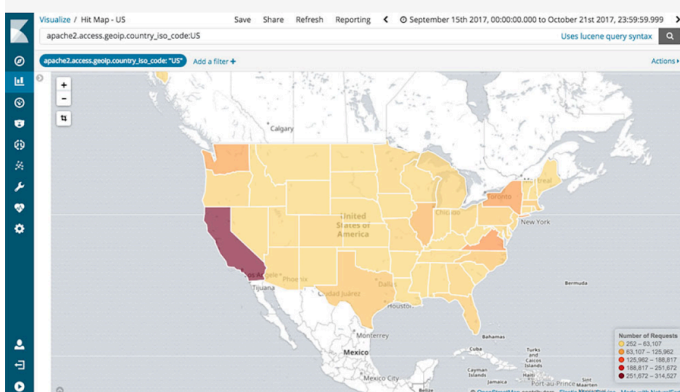

VISUALIZE & EXPLORE

A Picture's Worth a Thousand Log Lines

Kibana gives you the freedom to select the way you give shape to your data. And you don't always have to know what you're looking for. With its interactive visualizations, start with one question and see where it leads you.

Start with the Basics

Kibana core ships with the classics: histograms, line graphs, pie charts, sunbursts, and more. Plus, you can use Vega grammar to design your own visualizations. All leverage the full aggregation capabilities of Elasticsearch.

Put Geo Data on Any Map

Leverage the [Elastic Maps Service](#) to visualize geospatial data, or get creative and visualize custom location data on a schematic of your choosing.
